The need for academic referencing skills

- Programmes emphasise academic writing as a key skill for student success.
- Student teachers need to be able to develop an argument, synthesise knowledge and evaluate evidence.
- Since 2020, the focus of the dissertation project has switched from data collection to an integrative literature review, which places greater emphasis on students' ability to handle secondary sources.
- This has likely been a factor in an increase in the number of student queries **related to referencing** received by the Digital Library – up to a third of the total number of queries.
- Referencing is also the most frequently consulted section of the Academic Writing Toolkit.

A multi-stranded approach?

- Complexity of relationship with referencing
 - Plagiarism anxiety
 - Acknowledgement
 - Criticality
 - Own voice
- Support provision often inconsistent
- Gap between what is assumed to be known and what is known
- Challenge of supporting online distance learners
 - Embedded approach not always possible
 - Pre-service teachers and research

Updating the Quick Referencing Guide

- 'Quick-reference summary' was short on useful information & rarely used
- Updated and redesigned to provide more detailed guidance on a greater number of items
- Guided by FAQs sent to library
- Tabular form to maximise space use
- Editorial and visual design input
- User-centred decisions informed not just by our professional domain knowledge but by consideration of our own experiences of being postgraduate students

DEFINITIONS

In-text citation

In-text citations are located within the main body of your work. They contain brief information about the sources used; author, date and page number (if quoting directly from a source.) See examples below.

Reference list

A reference list is included at the end of a piece of work to indicate to the reader all materials 'referred' to by the author during that work. The list is presented in

GENERAL POINTS

All students are required to include a reference list at the end of their work, fully crediting any in-text citations they have made. A bibliography is optional, except for students working on their thesis who must include a bibliography also.

Proper consistent referencing is crucial because:

- References can be located and checked by the reader
- Referencing is a standard procedure for academic writing
- It is vital for avoiding plagiarism and to comply with copyright laws by acknowledging fully the use of somebody else's work
- Referencing demonstrates how much research has been undertaken and helps to strengthen the writer's argument

To help ensure consistent referencing, punctuation is also very important. See the formats and examples on the next page for punctuation rules.

Drop-in referencing workshops

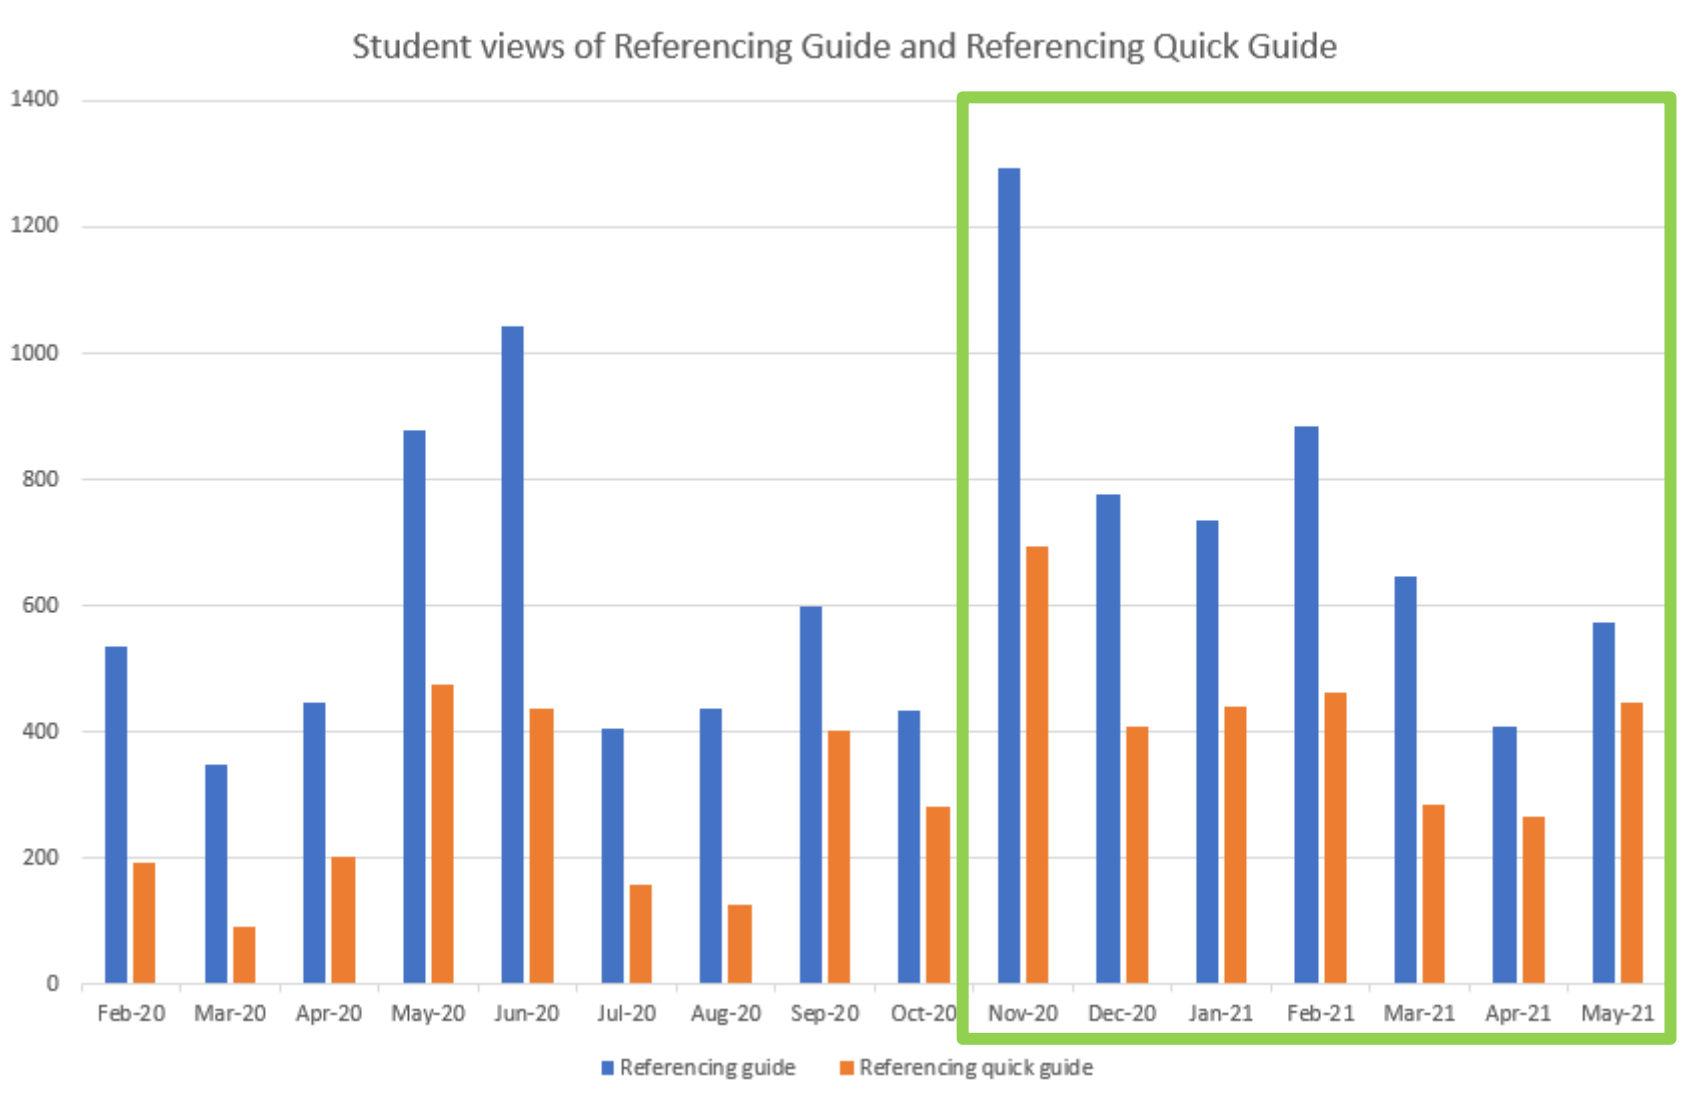

- Give students the opportunity to have their queries answered in person and in real time
- Inform students regarding some key referencing related topics
- Themes based on students' library queries
- A way of promoting and modelling use of the Referencing Guide
- Scheduled every 5-6 weeks on Tuesday evenings

Suggestions for improvements

Future plans

- More webinars
- Address access by making edited videos downloadable
- More engagement analysis (live and recorded)
- Deeper qualitative exploration
- Collaboration with faculty
- Use of collaborative space
- Further Guide updates (web-based version)

Referencing workshop series

These videos have been created from a series of five referencing workshops. Each workshop is split into two main sections; firstly, instruction on a referencing-related topic and secondly, student queries.

You should find answers here to many of your referencing questions.

1: Plagiarism and common knowledge

2: Constructing references from scratch

3: Critically evaluating sources and peer-review

4: Identifying and referencing different item types

5: Series recap and referencing FAQs
